

United States Department of the Interior

OFFICE OF THE SECRETARY
Washington, D.C. 20240

MAY 27 1997

Honorable Don Young
Chairman, Committee
on Resources
House of Representatives
Washington, D.C. 20515-6201

Dear Mr. Chairman:

The 1996 Agriculture Reform Act, Public Law 104-127, Section 390 requires the Secretary of Interior to report to the Congress on any unreserved and unappropriated lands (or mineral interests in the lands) under his jurisdiction, which may be suitable for sale or exchange to benefit the Everglades Restoration effort.

In accordance with Section 390(g) of this Act, all Interior Department agencies examined their holdings. The Bureau of Land Management (BLM) is the only agency which has holdings meeting the specified criteria. BLM has identified 95,000 acres of split estate minerals and two surface tracts within the State of Florida, which are suitable for disposal through exchange (see Attachment 1). BLM also identified unreserved and unappropriated lands outside the State of Florida with potential for disposal or exchange. Estimated values are shown for each site (see Attachment 2).

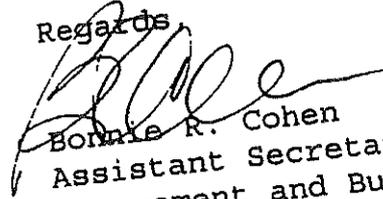

Please note many lands identified appear to have conflicts which may preclude them from being considered for disposal or exchange; and, in several of the States, BLM identified little or no land available for disposal because of other commitments. Conflicts include high disposal costs, critical natural or cultural resources and habitat, mineral claims and leases and hazardous conditions. The Report specifies such impediments.

Section 390(f) of the Act directed the Secretary to identify any Federal lands within the State of Florida for which there is no compelling Federal need. These lands are available for disposal or exchange. Funds raised in this manner are deposited in a special account established for Everglades restoration activities. One property has been sold and six are actively being developed for sale. Approximately 30 additional properties are being investigated for potential sale.

RECEIVED
8/29 302

The Department of the Interior is working closely with the General Services Administration to further identify, evaluate and dispose of excess Federal property for this important initiative. If you need further information or have questions regarding this report, please call Claudia Schechter, 208-6254 or claudia_schechter@ios.doi.gov. Thank you.

Regards,

Bonnie R. Cohen
Assistant Secretary - Policy,
Management and Budget

BLM LANDS AVAILABLE FOR DISPOSAL BY STATE

The following material is data that was collected in March 1997 in response to Section 390 of the Agricultural Reform Act (PL 104-197) (Act). This section of the Act required the Department of the Interior to identify unreserved and unappropriated Federal lands that were available for disposal or exchange to aid in restoration of the Florida Everglades.

An inventory of these lands was compiled from information supplied by BLM State Offices. The following criteria and guidelines were used in determining lands that met the requirements identified in the Act:

1. Only lands that had been identified for disposal in a land use plan were to be considered;
2. Lands currently withdrawn for other purposes were not to be considered;
3. Lands contained in Recreation and Public Purpose applications, identified for state selection, Native American allotments, or local government purposes were excluded;
4. Lands that were segregated for other exchange or that were under existing agreements for exchange were excluded.

The inventory was made on a county basis and totalled by state. In addition to identifying lands the following impediments to disposal of the identified lands were to be listed as appropriate:

1. Lack of legal access;
2. Mineral leases located on the property;
3. Mining claims exist on the property;
4. Habitat for threatened or endangered species;
5. Lands located in floodplains or within wetlands;
6. Lands contain historical or cultural values;
7. Hazardous material or other contamination exists;
8. Survey or title problems exist.

STATE/COMMUNITY LISTINGS

<u>State</u>	<u>Acres</u>	<u>Community acres</u>
ARIZONA	453,950	Phoenix-21,400, Tucson-1987
COLORADO	93,741	Denver-0, Colorado Springs-3,000
IDAHO	110,022	Boise-0
MONTANA	94,520	Billings-0, Great Falls-0
NEBRASKA	6,615	Omaha-0, Lincoln-0
NEVADA	898,460	Las Vegas-106000, Reno-26,000
NEW MEXICO	813,531	Albuquerque-0, Santa Fe-1300, Las Cruces-56,000
OREGON	70,308	Portland-0
UTAH	132,931	Metro Salt Lake City-2319
WYOMING	694,200	Cheyenne-1000
GR TOTAL	3,368,278	

Notes:

California has no lands that are not already committed to needs identified under the California Desert Protection Act or other prior commitments in support of exchanges.

Montana has a limited supply of lands available due to existing legal mandates, e.g., Crow Boundary lands and Gallatin NF exchange.

OTHER POTENTIAL IMPEDIMENTS TO DISPOSAL
CLARK COUNTY

1. Clark County, as well as many other counties in the state of Nevada are adamantly opposed to exchanges for land outside the state of Nevada.
2. The Congressional representatives do not support exchanging lands in Nevada for lands outside Nevada.
3. The Southern Nevada Public Lands Management Act of 1997, drafted by local Congressional representatives, identifies sale of land in the Las Vegas Valley disposal area, to generate funds for infrastructure needs.
4. Local residents as well as Clark County are concerned with the growth in the valley. Specifically air quality and water quantity are major concerns by all the valley residents and will play a major roll in future disposal of lands.
5. Approximately 7,000 acres remain in the Santini-Burton designated sale disposal area.

Grazing permits and leases encumber much of the property. Factors such as remoteness, difficult access, poor soils and climate and availability of services and utilities limits interest in the property. Finally, budgetary and staffing constrains the amount of acreage that can be prepared for disposal at any given time.
